The pricing for tile-based orders is cumulative. In other words, each time you order additional tiles under an existing Contract, these will be added to your existing number of tiles you hold in order to calculate the appropriate banded price. NOTE: This only applies for orders placed under the same Contract and no account is taken of data you hold under other contracts you have in calculating the fees due under this Contract.

If you are an existing customer and are unsure of the number of tiles you already hold, please contact Apogee on the telephone number below, and we will confirm your holdings to you.

Example:

Initial order of 8 tiles for 1 user = 8 x £7.34 = £58.72
 Subsequent order of 60 tiles = 8 tiles + 60 tiles = 68 tiles
 Therefore annual fee for 60 tiles is charged at the 65+ tile band = 60 x £1.83 = £109.80

If you wish to order data on the basis of individual tiles, please list the tile references of the required tiles in full (e.g. TQ22) in the space below. If there is insufficient space please supply the tile references on a separate sheet.

If you are unsure as to which tiles you require please contact Apogee Data Consulting, using the details below; a GIS Consultant will be happy to discuss your requirements.

Please indicate the appropriate terminal banding, as specified above, covering the number of terminals upon which you want to use the data.....
