

DANIOLABS

Zebrafish research positions

As a result of recent successes, DanioLabs is expanding its operations and is looking to recruit in a number of different positions.

A **senior researcher position** is being created to lead an internal biology group. The individual will have exceptional scientific acumen, be ambitious, highly energetic team player and have excellent leadership skills. He/she should have a proven track record in the zebrafish field. Closing date: 1st March

A **postdoctoral position** will be suitable for a researcher with a proven track record of being able to deliver in the zebrafish field who wants to fast track their career. Closing date: 14th February

A **technician post** will provide the successful applicant with the opportunity to mix aquarium and lab based work. The individual should be a friendly, meticulous, hard working, energetic and dexterous team player. Previous zebrafish experience is desirable but not essential for this position. Closing date: 14th February

All positions will provide a unique training exposure, publication opportunities and future career enhancement and flexibility, in a dynamic and friendly commercial environment. Previous industrial experience will be viewed positively. Applicants should send their CV, full publication list and details of 2 referees to recruitment@daniolabs.com.
