

Artbeats Hi Definition Product Listing (August 2002)

All High Definition products are licensed royalty-free for all uses including broadcast, feature film, multimedia and Internet. The files are delivered in Apple QuickTime format in 1080p (1920 x 1080) encoded with PhotoJPEG at a high quality setting and frame rate of 30fps. The footage is sourced from 35mm film and computer generated images.

Starter Kit HD

The Starter Kit includes an attractive binder containing full-color quick reference cards for every HD product in the Digital Film Library plus a CD-ROM with 3 fully functional clips. The clips are fully usable at HD resolution with no watermarks. In addition, you'll receive an Artbeats Demo CD containing thumbnails of several clips in the Library. At \$79.00 it's a great way to get started with the High Definition Artbeats Digital Film Library!

Centrifusion HD

Intricately detailed kaleidoscopic wheels featuring smooth centrifugal movements in a variety of complimentary colors. These hypnotic images are seamless looping for unlimited play.

Centristorm HD

These 15 vivid kaleidoscopic wheels feature astounding displays of brilliant color and high speed movement all centered around a single focal point. These seamless works of art will energize any project.

Coastal Aerials HD

Explore the beautiful west coast from a bird's eye view with these 14 HD clips. This collection enables you to soar over crashing waves, roam rocky shores and journey down golden beaches.

Digidelic HD

A collection of 10 HD seamless backgrounds. Wildly undulating shapes and colors in a variety of bold themes. Some of these unique clips have a look straight out of the 1960's, while others provide a more modern version of psychedelic expression.

Digital Aire HD

Stunning computer-generated looping backgrounds. There are 8 HD clips included in this product.

Digital Biz HD

Nine seamlessly looping computer generated Cyber-Tech backgrounds covering topics relevant to the business world.

Digital Dimensions HD

Eleven clips from Digital Dimensions rendered at 1920x1080 for use in HD productions. The elements of technology expressed in 3D space, these animations will captivate the imagination with techno grids, wire frames, "light" frames, 3D symbol environments and much more.

Digital Edge HD

Another addition to our digital HD series. These computer generated backgrounds aren't for the faint of heart. The bold color schemes and wildly energetic grunge elements place this product on the cutting edge.

Digital Microcosm HD

Ten clips from *Digital Microcosm* rendered at 1920x1080 for use in high definition productions. High quality digital renditions of microscopic environments great for backgrounds, healthcare illustration and teaching. Includes capillary fly thrus, neurons, molecules and more!

Digital Moods HD

Digital Moods HD contains 9 seamless looping computer generated backgrounds. Various subtle pastel textures gently flow, kaleidoscopic effects unfold, ethereal forms gyrate, and geometric shapes morph.

Digital Web HD

The HD version of *Digital Web*; filled with stunning backgrounds and views of web oriented subjects. *Digital Web* includes 9 HD clips.

Earth Views HD

Earth Views HD contains views from the earth with a variety of angles including equatorial, polar, and various quartered views. Source: Computer generated using satellite image data.

Hyperscopes HD

A shocking explosion of riotous colors and hyperactive visuals. These intense kaleidoscopic creations are seamless looping and wild enough to pull anyone under their spell.

Artbeats Hi Definition Product Listing (August 2002)

Kids of Summer HD

Includes charming views of boys and girls engaged in a variety of activities from eating juicy watermelon to sidewalk chalk at the park. The collection will make you feel like a kid again!

Monster Waves HD

Monster Waves HD contains dramatic footage from Hawaii and other tropical locations shot by one of the world's top cinematographers. Includes some of the largest waves ever seen in Wiamea Bay on Hawaii's North shore. Source: 35mm film.

ReelExplosions HD

ReelExplosions HD contains 8 clips selected from ReelExplosions 3. The 35mm footage was scanned at 2K resolution, then optimized for the standard high definition frame size of 1920 x 1080 pixels.

ReelFire HD

ReelFire HD includes 8 clips selected from *ReelFire 1* and *ReelFire 2*. The 35mm footage was scanned at 2K resolution, then optimized for the standard high definition frame size of 1920 x 1080 pixels. Four of the clips are seamless.

Sky Effects HD

Eight beautiful clips from the D1 resolution version of Sky Effects. The 35mm footage was scanned at 2K resolution, then optimized for the standard high definition frame size of 1920 x 1080 pixels.

Tranquiliscopes HD

These tranquil kaleidoscopic animations feature mesmerizing displays of evolving shapes and colors. This collection offers a variety of themes, all seamless looping.

White Puffy Clouds HD

White Puffy Clouds HD contains 7 HD clips from our D1 collection. The 35mm footage was scanned at 2K resolution, then optimized for the standard High Definition frame size of 1920 x 1080 pixels. The frame rate is 30 fps "progressive" with a progressive scan—each frame matching one film frame—as opposed to an interlaced scan.
