

Thank you to all those who have kindly supported us in our first month of milling. We have had some great comments – particularly as to how IMPRESSIVE the machine is!

“The machine is good, quiet and hassle free – and there’s no mountain of plastic bags to get rid of as the protein arrived in bulk on the machine! Also, I like the fact we are invoiced for both the milling and ingredients together and not forced to pay by direct debit”

Mr Kinge,
Bunwell

Many farmers have also appreciated the friendly yet thorough approach to preparing feed rations from John Fish at Vitfoss. It appears many previous cattle rations have been high in starch, which in turn produce acid in the stomach and this has previously led to the incidence of bloat. Historically this then led to the use of additional additives in the feed to reduce the acid – a remedial albeit an expensive approach to the problem. Using the Vitfoss nutritionists we are able to create well balanced rations providing the required levels of protein, energy, starch, fibre, minerals and vitamins that the animals need.

Mr Nickalls,
Wymondham
(he had previous incidences of laminitis despite including straw & acid control additives in the ration)

“I was nervous about using a lot of rapemeal within the ration as it is known to have a bitter taste. However, I was encouraged by the knowledge within Vitfoss and the feed actually did look the best I had seen milled and it smelt good too. I must admit the cattle did not eat so much to begin with but have since got onto it and whilst it’s too early to say the cattle have done better on it, there certainly hasn’t been any scouring or bloat to date and I shall certainly be using the Arnolds service again”

“I am so pleased with the consistency of the mix, the speed of the milling and the quality of the end product. The Vitfoss rations were in fact cheaper than I had previously been advised yet the stock have soared away on them”

Mr Collinson,
Kings Lynn

The machine was an expensive purchase but we hope you will appreciate like us that the incidence of breakdowns should be very minimal giving our customers the very best local service for milling.

“What a fantastic machine, and a good man you have operating it. I also respect you (the Arnolds) for the upfront milling costs and that I know my neighbours will be paying the same for the same quality service”

Mr Marsh,
CJC Lee,
Saxthorpe Ltd

Our current milling charges are shown below:

Tonnes per Visit	Straight Rolling or Grinding Cost (£/T)	Mixing Cost (inclusion of other products ie mineral/protein)	Outside of Norfolk or Suffolk
1-6	19.00		
7-13	16.50		
14-34	15.50	+£2/T	+ 50p/T
35-55	13.50		
56+	11.50		

Note:

Minimum charge £60.00
Mixing cost does not include product cost

Payment strictly maximum 30 days from date of invoice - interest charges apply thereafter

Payment can be by cheque or BACS.

Prices as at Oct 09.
