

Professional Disc provides approximately 85 minutes of DVCAM recording time, and 75, 57, and 45 minutes of MPEG IMX recording at 30, 40, and 50 Mb/s respectively. At the highest data rate, picture quality is equivalent to Digital Betacam. We transfer disc to tape, or from tape to a disc. Stock is not included in these prices. For NTSC to PAL or PAL to NTSC please see our Alchemist Price Guide. NTSC to NTSC please add £25.00

IMPORTANT When transferring TO XDCam we must know what data rate you require before commencing. We will compile a number of tapes to an XDCam disc, but it will be priced at the individual rates added together then less a 10% discount.
