

Pressure Regulating System

Pressure Regulating System

Pressures to 20,000 PSI

Remote Dump Station for Safety and Performance!

15K Gauge Board

20K Gauge Board

Features:

- Stainless steel construction
- Inlet connections:
 - 15K - 1/2" NPT
 - 20K - 9/16" MP
- Alternative connection available.

Application:

The **Gauge Board** combines the Pressure Regulating Valve (PRV) with a standard pressure gauge for precision and added safety. The Gauge Board is a remote dump station which is highly recommended when the waterblasting work takes place at a distance from where the pump is located. Water flow is controlled by adjusting the Pressure Regulating Valve on the front of the device. The hoses attach to the water inlet/outlet in the base. Overhaul is easy and takes only a few minutes with the PRV Overhaul Kit.
