

## Rupture Disc Holder

20K Rupture Disc Holder with Safety Shroud.

Comes in 15K, 20K and 40K models.  
Control, Economy and Safety made easy!

The **Rupture Disc Holder with Safety Shroud** is designed to protect all water blasting equipment from dangerous over-pressurization. This type of device is frequently abused and made inoperable by having the rupture disc replaced by a coin or other substitute. Such substitutions defeat the safety features of the device, risking damage to the water blasting equipment, and more importantly, creating hazardous conditions for the operators.

The **15K Rupture Disc Holder** has a virtually “coin proof” design which has met with great success in overcoming the problem. Now safety and convenience have been further enhanced by the addition of a shroud over the discharge ports, which safely relieves pressure and eliminates potentially hazardous spray when discharging.

**Rupture Discs are specified by “Burst Pressure”**
