

Vulcan Stripper Rotary Gun - 40,000 PSI

UHP Air Activated Dual Trigger Rotary Control Gun.

Gun Model	Rotation Speed (RPM)	Air Requirement CFM	Max Flow rate l/min	Weight kg / lbs	Lance Lengths
VS	3,000	22	26	4.9 / 11	13" - 48"

The Vulcan Stripper delivers the power to clean the most difficult surfaces down to white metal quickly and cost effectively using a minimum amount of water. Operation of the Vulcan Stripper will require an air operated Multi-Mode Control Valve.

- Ultra-High Pressure Water Jetting produces a white metal surface standard equal to NACE No. 5/SSPC-SP12.
- Major paint and coatings manufacturers have developed lines of coatings specifically for ultra-high waterblasted surfaces.
- High pressure waterjetting is not only economical, but with so many environmental advantages it is swiftly becoming the preferred process for coating removal by many major industries.

Multi-Mode Tumble Box Options:

1. Dry Shut Operation
2. Single Dump - One Gun Operation
3. Multi-Gun Operation: Each gun requires a Multi-Mode Tumble Box.
