

Abrasive Injector Nozzles

Material: Stainless steel / Tungsten carbide

Application/ Features:

This nozzle is designed for the ultimate in efficiency and production for abrasive injection applications. The Inlet Adapter, Abrasive Injection Body and Nozzle Holder are made of stainless steel for corrosion resistance and durability. The Tungsten Carbide nozzle Insert is designed to withstand the wearing action of the abrasive and water, and to maintain a good, even spray pattern.

The interchangeable Blasting Nozzle is easily replaced to suit different pressure requirements and flow rates. This enables the Abrasive Injector Nozzle to be used with almost any water jetting unit.

Nozzle Type	L x Ø (mm)	Connection	Insert Type	Working Pressure max. bar / PSI	Weight (kg)
510019A	125 x 42	1/2" NPTF	1/4" NPT	700 / 10,000	0.95
