

Type SIBR

Rotating Nozzle Type SIBR

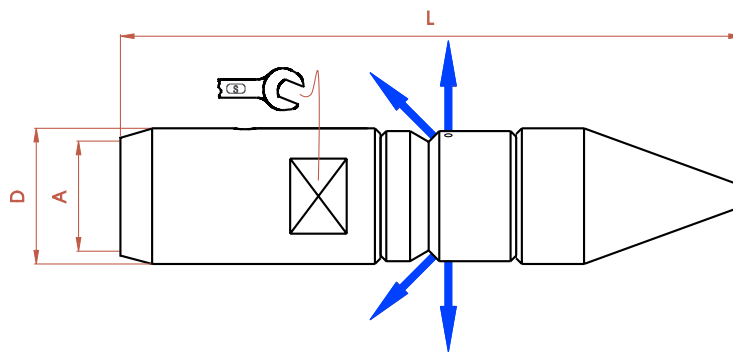

Characteristics:

- 2 jets 90° rotating to the side and 2 jets 45° back rotating.
- Most popular nozzle and suitable for all the general cleaning jobs. Because of the 45° back jet easy to use in combination with a flexible hose.
- Available with one or more front jets to remove any blockages.
- By reversing the rotor, the nozzle can also be used on a rigid lance or lancing machine.

Recommendation:

- If the diameter of the tube is greater than the length of the nozzle, always use a rigid extension lance between the flexible hose and the nozzle.

Notes:

Type SIBR
