

## Piranha & Shark

The **Piranha** is the newest addition to the Salotech family of root cutters. When attached to just about any jetter, it turns into one pound of unstoppable power. This means the Piranha eat through the most stubborn roots, rock hard grease, packed solid soil and just about any other type of blockage that you might run up against.

- Exclusive 3" or 4" dual flail cutter blades help prevent most line hang-ups and premature wear.
- Self-propelled with low-profile skids
- Operating flow rates of 2 - 10 gpm and operating pressure of 1,000 - 4,000 psi
- 12.5 ounce weight
- 4" length
- 3" or 4" operating skid diameter

The **Shark** is designed to work with most trailer jets to eliminate obstructions in 4" - 10" pipe as long as 400 feet. The Shark features a safety device that allows the operator to position the cutter into the pipe - without entering the manhole. Plus, the Shark has an instant-lube access fitting that makes maintenance a snap and ensures trouble free operation.

- 4", 6", 8", 9" and 10" spiral tri-blade saw cutter.
- Self-propelled with low-profile skids
- 8 -12 GPM flow rate.
- 800 - 2,000 psi operating pressure.
- 8 lb weight.
- 9" length.
- 4", 6", 8", 9" and 10" operating skid diameter.
- 400 foot operating distance.
