

Root Cutting Nozzles

The Root Cutter removes all sorts of roots in the sewer.
 This tool is driven through the pipe by high water pressure.
 A turbine is responsible for the rotation of the cutting devices (knives).
 The ball bearing Root Cutter works smoothly.
 Scope of application: Big and strong roots in household sewers.
 Application Diam. 100mm+
 Max. WP. 120 Bar.
 Flow Rate 40-120 l/Min.
