

Hogwash Washdown Gun Nozzle

Warthog™ power now available for washdown guns

Coverage as good as a fan tip, but much greater power. The magic of controlled rotation, no-leak seals, and quality jets means more productivity, and more thorough cleaning of surfaces. The **Hogwash™** is built from the same reliable viscous braking swivel used in the **WS-1/2** sewer nozzle.

WSH Viscous Braking Swivel
AP2 Nozzle Tips

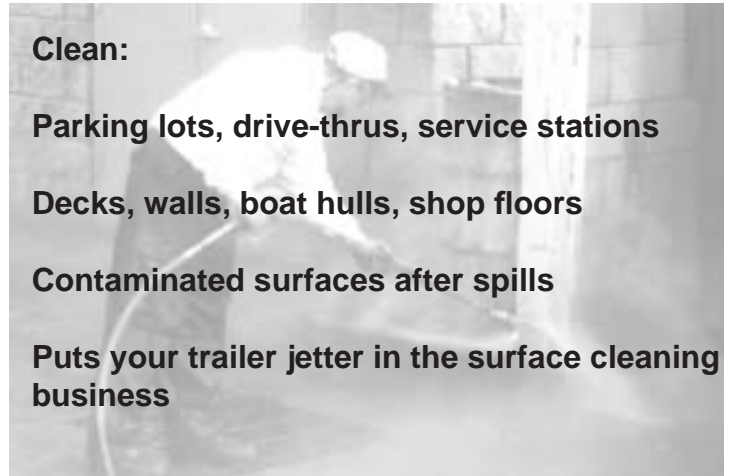

Clean:

Parking lots, drive-thrus, service stations

Decks, walls, boat hulls, shop floors

Contaminated surfaces after spills

Puts your trailer jetter in the surface cleaning business

Specifications

Model	WSH-3/8	
Max. Pressure	6 Kpsi	400 bar
Rotation Speed	300-600 rpm	
Flow	7-18 gpm	27-68 lpm
Length	4.4 in.	11 cm
Body OD	2.4 in.	6.1 cm
Weight	2.8 lb	1.3 kg
Inlet Port	3/8 npt	
Adaptor Available	1/2 npt	

Hogwash™ Jetting - Flow in gpm

AP2 Jet ID	1000 psi	1500 psi	2000 psi	2500 psi
.052	22° Head			7.2
.057			7.6	8.6
.063			9.2	10.3
.069			10.9	12.1
.075		10.9	12.6	14.0
.082		12.6	14.6	
.090	12.0	14.6

			16° Head	

- No-leak high pressure seal
- Controlled rotation speed
- Sealed, lubricated bearings
- Replaceable, powerful jets
- Durable construction
- Easy field maintenance

WARTHOG™ Nozzle Accessories

Super Centralizer

For WH or WG Models

Places the **Warthog™** closer to the sewer centerline, for more powerful cleaning of the top wall. It also keeps the nozzle back from blockage, allowing the powerful front jet to do its work. The Super Centralizer bolts to the standard centralizer.

Descaling Ports

90° jet ports can be added to the rotating head to enhance removal of scale from a drain surface. Tuberculation, corrosion products, soap scale, and minerals respond well to this option.

Custom Manhole Cleaning Equipment

The **MH-30 Manhole Head** and guard works with the **WG-1, WH-1/2** or **3/4 Models** to prepare manholes for repair. Whether the manhole will be coated, lined, or grouted; the Warthog-based cleaning equipment is an important first step.
