

HCD 800/1 Centre Drive Rewind Machine

This heavy duty centre driven machine is designed for the rapid conversion of a wide range of films and foils.

The machine can be supplied either with a fixed centre proportional tension and braking system using ultra sonic sensing and a particle brake delivering constant, accurate and sensitive control or a non proportional manually adjustable pneumatically operated disc brake.

The layout and operation make it extremely user friendly.

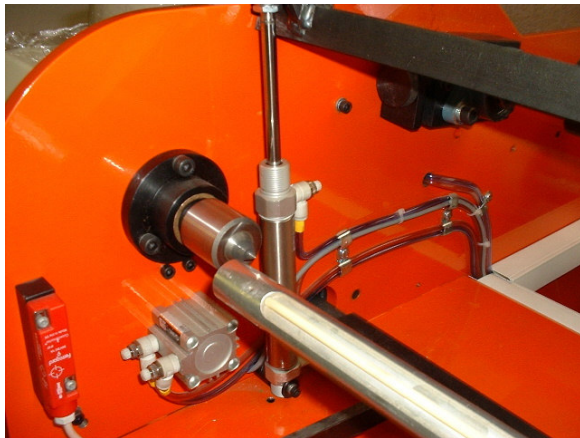

Machine specification:-

- ❑ Variable speed drive with adjustable ramp up / down facility up to 160Mts./min.
- ❑ Programmable electronic counter for rewind length and braking.
- ❑ Adjustable pneumatically operated ironing roll facility.
- ❑ Precise tension and braking control.
- ❑ Adjustable tracking rollers to ensure crease free winding.
- ❑ Quick release easy to change master roll with optional splice table.
- ❑ Single position rewind station with safety interlock switch.

Master roll – Max. Dia.600mm. Widths up to 800mm. Core Dia. 76mm & 150mm

Rewind roll - Max. Dia.250mm. Core widths up to 900mm. Core Dia. 25mm up to 76mm (on order).

Machine Features.

Easy release rewind mandrel.

Assisted rear mandrel loading.

Adjustable tracking rollers.
