

**ProTag Retail Security are the original designers and only manufacturer for the unique, patented ProTag™ flexible sensor tag.**

A choice of sensor cables is available for connecting between the ProTag™ flexible sensor tag and your alarm system.

*If we don't already have a sensor cable to suit your application, we will work with you to design a bespoke item.*

Standard cables have a custom, shot moulded connector fitted to them, which incorporates an integral red LED. In normal operation the LED will illuminate according to the system state, clearly indicating if an item is protected.

We can also supply a simple two-part, shot moulded connector, designed to attach to your existing alarm cable. This option is perfect for prototyping or small installations.

**CCR-2.3G - curly sensor cable**

Can use all types of ProTag™ flexible sensor tag. Features a polyurethane sheath and moulded tag connector with LED.  
 Colour: grey.

Length of the coil is 260mm but can extend to 1.5m.

**CCY-1.1G - curly sensor cable, twin head**

Can use all types of ProTag™ flexible sensor tag. Features a polyurethane sheath and two moulded tag connectors with LED.  
 Colour: grey.

Length of the coil is 260mm but can extend to 1.5m.

**RC-1.2 - recoiling cable & swivel head adaptor**

Can use all types of ProTag™ flexible sensor tag. Features a flat cable with Kevlar a sheath.

Colour: black.

Trace length of 1.25m and a recoiling cable length of 1.35m.  
 Recoiling action can be selected to latch or free recoil.

**SCR-1.3G - straight sensor cable**

Can use all types of ProTag™ flexible sensor tag. Features a polyurethane sheath and a moulded tag connector with LED.

Colour: grey.  
 Length: 1.5m.
