

UV Checkers

ProTag Retail Security are the original designers and only manufacturer for the unique, patented ProTag™ flexible sensor tag.

ProTag Retail Security supply a range of ultra-violet verification units for checking bank notes, credit cards and documents.

Due to the increase in bank note and credit card fraud, staff require a quick and easy method of verifying the authenticity of items provided for payment.

Our complete range of electronic ultra-violet (UV) checkers assist in the authentication of bank notes, credit cards and documents. The most popular models are the MD-1188 mains powered unit, and the MD-1818 battery powered portable product. There is sure to be a model to suit your requirement.
