

# Wire Rope, Rigging and Accessories

We only use the best marine quality (316 stainless steel) for our wire and swage end fittings. Please note that the cost of these fittings includes the labour cost of swaging to the wire. An approximate cost can be calculated for wire assemblies by adding the swaged fitting price to the cost of the wire required. Additional charges for cutting, measuring and calculating can apply.

We are happy to quote for any wire rope requirements including: stainless yacht and architectural wires, guardrails, winch wires, garage door wires, etc. Wire to any diameter available on 100-metre reels - POA

## Wire constructions

1 x 19 - Rigid applications, standing rigging, brake cables, guard wires, etc.

6 x 19 - Flexible, fibre core, running rigging.

7 x 7 - Semi-rigid, standing rigging, haulage, etc.

7 x 19 - Flexible, steel core, running rigging, winch wires, etc.

	7 x 19 Galvanised		7 x 19 Stainless Steel AISI		1 x 19 Stainless Steel AISI
